

Dear Colleague,

Following the advice of the Public Health Agency of Canada on **mass gatherings** during the outbreak and carefully considering the **evolving situation with the coronavirus (COVID-19)** the Canadian Association of Radiologists has made the **difficult decision to CANCEL the CAR annual conference** scheduled from April 16-19 in Montreal.

On **Saturday April 18, 2020 from 1:30 – 4:00 pm** the **OARM** had previously planned to host the inaugural **Canadian Radiology Administrative Manager's Meeting**. This inaugural national event **WILL NOT** be taking place.

Many organizations are implementing travel restrictions for staff attendance at large meetings, as many of you are needed to support frontline and processes as this situation continues to evolve.

Thank you kindly for your interest, all bookings through the CAR for their conference will be refunded. We would kindly advise you to contact your travel agencies as soon as possible. The OARM has already been asked to coordinate efforts for a National Meeting next year. We will keep you posted.

The **OARM conference** is scheduled for **September 30 to Oct 3, 2020**. Please note you are all welcome to attend our conference. Details are available on our website. We will have more information about our topics soon.

Please, if you haven't yet completed the survey. The link is included below. We will be presenting the results at the OARM conference in September.

Any further questions about the Canadian **Radiology Administrative Manager Meeting** please email: headoffice@oarm.org attention National Manager Meeting.

For information about the **CAR Annual Scientific Meeting** reimbursement please contact info@car.ca

Keep well, be safe and we thank you again for your interest.
