

Extraordinary Caring. Every Person. Every Time.

Director, Diagnostic Imaging, Laboratory and Cardio Diagnostic

Niagara Health is a regional healthcare provider with multiple sites and a growing network of community-based services. Niagara Health is on a bold new journey to create a healthier Niagara.

The Niagara Health team is made up of more than 4,800 employees, 600 physicians and 850 volunteers who they count on to deliver extraordinary caring to every person, every time. They provide a wide range of inpatient and outpatient services to more than 450,000 residents across Niagara, including Acute Care, Cancer Care, Cardiac Care, Complex Care, Emergency and Urgent Care, Kidney Care, Long-Term Care, Mental Health and Addictions, Stroke Care and Surgical Care. Their Accreditation with Exemplary Standing is a clear demonstration of commitment to the highest safety and quality standards. As a community-based academic centre, teaching and learning, research, innovation and partnership are propelling us as we imagine a healthier Niagara. Niagara Health is excited to be planning for a new state-of-the-art hospital in Niagara Falls and redevelopment of its Welland site.

Reporting to the Executive Vice-President, Quality, Community Development and MH and Addictions, the successful applicant will provide leadership, management and direction across all sites of Niagara Health for Diagnostic Imaging, Laboratory and non-invasive Cardio Diagnostic services. The incumbent will demonstrate a strong commitment to the NH vision, and values; and will act as a resource to the medical staff, administrative staff, and external regulatory agencies in all issues relating to management of these areas. The incumbent will be responsible for ensuring the delivery of high quality and efficient patient care programs and services, and will ensure cost effective, innovative and quality patient care by appropriate utilization of hospital resources. The incumbent must demonstrate a strong progressive approach to management and a positive approach to delivering change and improvement with the ability to blend clinical and corporate perspectives.

The successful candidate will possess a Masters Degree in administration or a related healthcare field, as well as a minimum 5 years' managerial/leadership experience in a multi-site academic Diagnostic Imaging environment. S/he will have in-depth knowledge of imaging technologies and information systems, experience in integration of hospital and community initiatives, program development, implementation planning, organizational change and proposal development. The successful candidate will have superior interpersonal and leadership skills and abilities including but not limited to; communication, responsiveness, conflict resolution, change management, visionary thinking, organizational skills effective customer service, decision-making skills and problem solving.
